

## Errata for appended publications

Paper I: Equation (5) is missing a coefficient. The equation should be:

Paper I, Table 9, Column “K”: The superscript references for the minimum product price should be 84<sup>b</sup> and 209<sup>a</sup> (not 84<sup>a</sup> and 209<sup>b</sup>).

Paper II: The unit of the acetic acid concentrations listed in the experimental section should be vol-%, not wt-% (e.g. 33.3 vol-%, not 33.3 wt-%). However, this does not affect the comparison with the thermodynamic equilibrium calculations significantly, because the mass of 1 litre acetic acid is 1.05 kg.

Paper II: Equation (7) has an additional arrow instead of a plus sign. The equation should be:

Paper III: The unit of the acetic acid concentration mentioned in Section 4 and Figure 2 is misspelled: it should be 20 vol-%, not 20 wt-%.

Paper IV, Page 37, Section 2.2: The solutions were stirred at 100 rpm, not 1000 rpm.

Paper VI, Page 5: The solutions were stirred at 100 rpm, not 1000 rpm.

These errors have already been taken into account in the summary part of this thesis.
